THE new Tariff measure is not only the most acceptable Tariff Law put upon the books in many years, but ecomes a law earlier than any Tariff act since the first one enacted by an American Congress.

LOAN agencies are showing their confidence in the permanency of the business revival by directing their repentatives of the West to resume the making of loans on farm property at low rates of interest.

GOLD Democrats are the busiest people in the country just now. naking a sharp fight in every state where there is a political contest and re bringing into their ranks many who voted last year for BRYAN.

THE Tariff Bili as finally agreed apon by the conferees restores House rates on wool, and within a very slight fraction of Honse rates on angar. This stroys the last opportunity of the Democratic party to assert that the bili is favorable to the Sngar Trnst, and at the same time gives to the wooi producers of the country the protection which they had originally been given

which they had originally been given reason to suppose that they would receive.

The people of the United States have evidently profited by the lessons of the hard times during the past four years. The New York San (Demoratic) published, a few days since, a large number of telegrams from various parts of the country, especially the farming communities of the West, indicating that the farmers in every locality are taking advantage at the good prices which they are getting for their crops to pay off their mortgages. In every part of the country farm mortgages and other obligations of that character are being rangifly reduced in number and size, and, with the spiendid prospect and prices in sight, the coming year will southly be a sight, the coming year will southly sightly excluded in the piendid prospect and prices in sight, the coming year will southly sightly excluded the prediction in the indeptages about which the calamity spickers have indicated such distress.

Public Ledger BATEMAN renews his attacks upon ex-Candidate BRYAN in a recent publication in The Washington Star, insisting that his original statement regarding BRYAN's centribution was made with the understanding that no action against fusion should be taken by the Populist organization prior to the next

> SUNDRY Editors throughout the coun try seemed to be disturbed over the report that ex-Condidate BRYAN wears siik and ruffled night-shirts. But why not? Mr. BRYAN has become a pintocrat in the short time since he esponsed he cause of the dear people, and since he failed to get the Presidency through als efforts in this line, why should be not at least have the consolation of wearing a silk night-shirt since he is new amply able to pay for it?

AND now Alaska comes to the front with probably the greatest known gold mines in the world. Verily, things are going hadiy for the silver advocates and the calamity shrickers. Even before these great discoveries in Aiaska, there was reason to believe that this year's gold production would surpass that of any year in the history of the world, while the prospect of high prices abroad for our good crops warrants the bellef that other parts of the world will be sending in their gold for our grain during the coming year.

THOSE prophets of evil, predicting all orts of failures and misfortunes for Secretary SHERMAN'S conduct of the State Department upon the theory that he had passed the stage of active life and usefniness, find themselves brought no with a round turn by Mr. SHERMAN'S ringing letter of instructions to Minisdocument emanating from the State Department in many years has shown greater vigor, clearness of perception and fearlessness in the cause of justice than this, and it is incidentally a stinglng rebuke to those who have, by direction or innuendo, been attacking the Secretary of State, and through him the Administration.
